

NO-IRS INSTRUCTIONS

NO-IRS was developed based on the following facts and should be used following these directions.

First: Start using Jack Herer medical cannabis nightly and exclusively for several weeks using the built in vaporizer. The Jack Herer will build up in your system.

Second: To stop symptoms of menieres disease, SCD and other vestibular disorders after the several weeks of Jack Herer treatment: Set the bell switch to bell number one which is the Consecration Bell and play it for about 20

seconds. Sit down and relax. The side effects might include pressure on the brain and the sensation of very low level of brain tissue electrical charges. I have found this to be very reassuring. After 20 minutes of rest you will notice that the following has or is happening: Balance improved, reduced dizziness and nausea, brain fog is gone, increased energy and concentration. Ringing of the ears might be reduced but will not go away using this system.

In the event the Consecration Bell does not achieve the desired effects continue on to Bell 2 through 11 using the same process. Try different types of marijuana.

NO-IRS also contains a switch to turn on 12 separate musical notes that can be played on various pre-loaded instruments. Use this the same as described above.

Blue tooth has been added so you can listen to your favorite music through the included radio as you enjoy a peaceful day.

To re-charge the NO-IRS Vaporizer plug it into a standard USB cable.
